EDUCATION

Northeastern University

Master of Science in Computer Science

Boston, MA

09/2024 – 04/2026

- Coursework: Cloud Computing, Distributed Systems, Object-Oriented Design, Software Development

National Taiwan University

B.S., Double Major in Computer Science and Chemical Engineering

Taipei, Taiwan

09/2016 – 05/2022

EXPERIENCE

Software Engineer Intern

05/2025 – 11/2025

ByteDance (TikTok) | Go, Python, SQL, Redis, Docker, RAG, Multi-Agent

San Jose, CA

- Shipped AI-powered on-call diagnostic bot in Go serving **200+** internal users, reducing average resolution time **50%**, from 7 days to 3.5 days, by auto-aggregating data and retrieving past incidents at ticket creation
- Developed **6+** Go services that the diagnostic LLM agent invokes as tools for permission verification, access checks, log lookup, and bug filing, behind a unified card interface accessible to non-technical staff
- Designed multi-agent diagnostic workflows from internal runbooks for ad delivery debugging via RAG and LLM-based routing, automating **50%** of **30+** weekly ad-platform issues and reducing manual escalations previously involving **10+** specialists per incident

Software Engineer Intern

11/2024 – 01/2025

ReMo | Go, FastAPI, Docker, AWS ECS, React

Portland, ME

- Delivered ReMo's fundraising MVP: a **90%** accurate book spine recognition pipeline combining YOLOv11 detection, Internvl recognition, and custom LLM-based metadata extraction
- Built Go and FastAPI backend services achieving **sub-3s** end-to-end inference latency across the multi-stage OCR and metadata extraction pipeline
- Containerized and deployed services via Docker, AWS ECS, and API Gateway for high availability; optimized React frontend with lazy-loading and code-splitting, cutting initial page load **25%**

Software Engineer Intern

07/2023 – 08/2023

Yanray Inc. | C#, .NET Core, Azure App Service, Azure AI Vision, Redis, Cosmos DB

Taipei, Taiwan

- Delivered **95%** structured field extraction accuracy by building a business card recognition pipeline with Azure AI Vision and a custom LLM, deployed on .NET Core via Azure App Service with Application Insights telemetry
- Boosted metadata retrieval speed **31%**, from **175ms** to **120ms**, by caching reference lookups in Redis and optimizing Cosmos DB queries

Research & Development Intern

07/2022 – 08/2022

Acer | Python, PyTorch, OpenVINO, ONNX, YOLOv7, FaceNet

Taipei, Taiwan

- Trained and fine-tuned YOLOv7 and FaceNet models in PyTorch for face and QR recognition, then integrated them into a real-time Python assistant achieving under **300ms** latency for **6 concurrent users** via OpenVINO quantization and async inference
- Reduced model latency **50%** via INT8 quantization and ONNX conversion for on-device CPU deployment; submitted as a **patent** for hardware-level integration into Acer laptops

Research Assistant, Industrial Collaboration

02/2021 – 07/2021

Formosa Plastics and NTU | Python, Aspen Plus, Cantera, PyTorch, AutoML, Windows

Taipei, Taiwan

- Built a Python Windows desktop app wrapping Cantera, used by Formosa engineers to design a new **300,000 ton/year** EDC cracker for the Texas plant; ran PFR analysis **3 times faster** than Aspen Plus
- Tuned 31-reaction EDC kinetic mechanism in Aspen Plus, then trained an AutoML neural network on **80,000** plant measurements, achieving under **1%** error on cracking and coking rates vs Mailiao and Texas plant data
- Delivered design curves to Formosa Heavy Industries for thermal and CFD analysis during pre-commissioning

TECHNICAL SKILLS

Languages: Python, Go, JavaScript, TypeScript, C#, C++, Java, SQL, Bash

Backend & Frontend: Flask, FastAPI, .NET Core, Spring Boot, Node.js, React

Cloud & DevOps: Microsoft Azure (App Service, Application Insights), AWS (ECS, API Gateway), GCP, Docker, Kubernetes, CI/CD

Process Modeling & ML: Aspen Plus, Cantera, PyTorch, scikit-learn, AutoML, RAG, multi-agent systems

Databases: SQL Server, PostgreSQL, MySQL, Redis, MongoDB, Cosmos DB

Practices: System integration, observability, on-call response, automation scripting, internal tooling
