EDUCATION

Northeastern University

Boston, MA

Master of Science in Computer Science, Minor in Digital Media

09/2024 – 04/2026

- Coursework: Large Language Models, Computer Vision, Cloud Computing, Object-Oriented Design

National Taiwan University

Taipei, Taiwan

B.S., Double Major in Computer Science and Chemical Engineering

09/2016 – 05/2022

- Coursework: Machine Learning, Computer Graphics, Cognitive Science, Human-Computer Interaction

EXPERIENCE

Software Engineer Intern

05/2025 – 11/2025

ByteDance (TikTok) | Python, Go, LLM Agents, RAG, Multi-Agent, Prompting

San Jose, CA

- Shipped an LLM-powered ad-platform diagnostic agent for **200+** on-call engineers, reducing resolution time **50%**, by architecting prompt stacks that route tickets and retrieve relevant past incidents at ticket creation
- Enabled non-technical staff to self-resolve routine incidents without engineer escalation by designing a tool-calling layer of **6+** Go tools the LLM invokes for permission checks, access verification, log lookup, and bug filing
- Automated **50%** of **30+** weekly incidents and removed handoffs that previously involved **10+** specialists per ticket by encoding internal runbooks into multi-agent workflows via RAG and LLM routing

Software Engineer Intern

11/2024 – 01/2025

ReMo | Python, Go, FastAPI, YOLOv11, React, Docker, AWS ECS

Portland, ME

- Delivered ReMo's fundraising MVP, a book spine recognition pipeline reaching **90%** field-level extraction accuracy, by combining YOLOv11 detection, Internvl recognition, and custom LLM-based metadata extraction
- Sustained **sub-3s** p95 end-to-end latency across the multi-stage OCR and metadata extraction pipeline by engineering the Go and FastAPI backend services
- Maintained high availability for the backend by containerizing services with Docker and deploying to AWS ECS
- Cut initial page load **25%** by applying lazy-loading and code-splitting to the React frontend

Software Engineer Intern

07/2023 – 08/2023

Yanray Inc. | C#, .NET Core, Azure App Service, Azure AI Vision, Redis, Cosmos DB

Taipei, Taiwan

- Delivered **95%** field-level extraction accuracy on a business card recognition pipeline by combining Azure AI Vision with a custom LLM, deployed and monitored on Azure App Service with Application Insights
- Cut metadata lookup latency **31%**, **175ms** to **120ms**, by caching in Redis and tuning Cosmos DB queries

Research Assistant, Reinforcement Learning

07/2020 – 12/2021

Computational Chemistry Lab, NTU | Python, PyTorch, RL, Self-Attention, Behavior Cloning

Taipei, Taiwan

- Built an OpenAI Gym MDP environment for force-field geometry optimization across **20+** reward/state iterations
- Implemented a multi-head self-attention policy with residual layer-norm, trained via behavior cloning over BFGS demonstrations for permutation invariance across molecule sizes; explored **PPO** and **SAC** for reaction-path search

PROJECTS

Pebble | AI Psychologist startup · Python, LLM agent, safety, evals

2026

- Architected a CBT mental-health agent where every node carries a written SPEC, implementation, and automated evaluator, by adopting the skill-as-node design from Rollwage et al. 2026 in *Nature Medicine*
- Engineered a defense-in-depth safety stack verified end-to-end with **95** automated tests and per-decision JSONL audit logging across multi-turn sessions, by composing risk detection, jailbreak detection, a hardcoded crisis protocol, and an output guard that fails closed on violation

PUBLICATIONS

B.-C. Ke, **M.-H. Li**, et al. *TurnAhead: Designing 3-DoF Rotational Haptic Cues to Improve First-person Viewing (FPV) Experiences*. **CHI 2023, Honorable Mention Award**. Designed and iteratively refined a multimodal VR interaction system in Unity, Meta Quest 2, and Arduino with 3D-printed hardware, validated through 4 controlled user studies with 30+ participants. doi:10.1145/3544548.3581443
